

INTRODUCING

DART

YOUR LANDING GEAR SYSTEM SOLUTION!

BENEFITS

ENHANCED SAFETY

With cranking no longer needed to operate landing gear, injury worries are less of a concern.

EFFICIENCY REDEFINED

Seamlessly align your 5th wheel and coupler height, simplifying drop and hook processes.

DAMAGE PREVENTION

Set legs to the correct height, reducing landing gear damage and maintenance costs.

HOW IT WORKS: Our Deploy and Retract Technology (DART) converts your landing gear operation from manual cranking to the push of a button. This system upgrade can be installed at the factory or retrofitted onto your existing trailer.

WHY IT WORKS: Say goodbye to unseated trucks, high workers' compensation claims, and inefficient hook-and-drop processes. Our device simplifies landing gear deployment and standardizes your coupling process, saving you time and money.

INNOVATIVE DESIGN FEATURES

- **MANUAL OVERRIDE:** Ensures operation even without power, eliminating downtime risks.
- **WEATHERPROOF DESIGN:** The sealed control box protects against water and dirt.
- **ROBUST ACTUATOR:** Thoroughly tested to ensure reliable and consistent performance.
- **MAINTENANCE-FREE:** Retrofittable design requires minimal maintenance.

SEE IT IN ACTION!
